“Believe and act as if it were impossible to fail.”

—CHARLES F. KETTERING
Everything we do at Kettering Health Network begins with a spark of inspiration—an idea, a dream, a calling—and becomes reality through people working hand in hand. Each day, our physicians, employees, and volunteers partner with patients, families, and community members to deliver physical and spiritual care throughout the healing process. At each stage, our faith-based culture empowers employees to nurture the connection between the mind, body, and spirit within themselves and with those we serve.

As we transform the healthcare experience through whole-person support, our entire team is dedicated to providing each individual with the most appropriate care in the most appropriate setting. The accomplishments highlighted throughout this report demonstrate our commitment to delivering expert care. The patient remains our central focus as we continue to foster growth and innovation to meet the needs of the communities we serve.

At Kettering Health Network, people are the heart of our mission. We are called to care, and as we pursue our calling to extend God’s love, we touch the lives of men and women like those whose stories follow in the pages to come. The care delivered to each patient resonates through their families, friends, and communities—one person at a time.

The result: an enduring partnership dedicated to creating a brighter, healthier future. Thank you for supporting our sacred work.

This report is published by Kettering Health Network to share the sacred work the network has accomplished in the past year.

BOARD OF DIRECTORS
Three-year-old Henry watched his dad mow the yard, as he did every Sunday morning. But when the lawnmower shut off and Damon fell to the ground, Henry knew something was wrong. “He started saying, ‘Daddy did something!’” Damon’s wife, Whitney, recalls. “I ran to the window and saw Damon lying face-down in the front yard.”

It was Father’s Day morning and at only 30 years old, Damon had a heart attack. Whitney found her husband unconscious on the ground, lips blue. She called 911 and performed CPR until the paramedics arrived and took Damon to Southview Medical Center, where he arrived in full cardiac arrest.

Kettering Health Network cardiologist Brad Gibson, DO, performed a cardiac catheterization, a diagnostic test to find a potential cause. “I didn’t really expect to find anything,” Dr. Gibson says. “Damon had no warning signs and no previous health conditions such as high cholesterol or a family history of heart problems.”

Much to everyone’s surprise, Dr. Gibson found 95 percent blockage of a main artery. “Most people do not survive a cardiac event of this significance,” he says. Damon doesn’t remember much about his hospital stay, but when he returned for a follow-up, he remembered Dr. Gibson. “Our family still tells us how pleased they were with the medical staff and with the quality of care we received,” Whitney says.

Thanks to the care team, Whitney, who never left his side; and little Henry, Damon made a full recovery, and his latest heart screening shows his heart is healthy. “Damon was lucky to get the urgent treatment that he needed, and he’s made a remarkable recovery,” Dr. Gibson says.

And Damon agrees: “I’ve got a couple of heroes in my family. The whole experience has made me appreciate them more and enjoy the moments that I have now. I don’t think I’ll ever know how close to the edge I was, but I appreciated the way everyone worked together to help me. The medical team was like a family.”
HIGHLIGHTS FROM THE NETWORK

The mission to bring innovative, whole-person care to our communities is the foundation upon which Kettering Health Network was built and the foundation upon which we continue to build.

CHARLES F. KETTERING
Born in 1876, inventor Charles F. Kettering spent most of his life pursuing innovation and problem-solving. To fulfill his vision for the use of innovative technology in everyday patient care, his son, Eugene, and Eugene’s wife, Virginia, built a hospital as a living memorial in his honor. The Ketterings joined the Seventh-day Adventists to help and operate the hospital because they admired the Adventist healthcare philosophy. What started as a project to honor a father has grown into a healthcare network that embodies the Ketterings’ first vision.

KETTERING HEALTH NETWORK TODAY
Today, Kettering Health Network is a not-for-profit network of eight hospitals, two emergency centers, and numerous outpatient facilities serving the people of southwest Ohio. Patients have access to a broad range of services for every stage of life, including exceptional maternity care, state-of-the-art cancer fighting technology, leading heart care, comprehensive orthopedic care, as well as revolutionary brain and spine surgery.

ACCOMPLISHMENTS

#1 in Ohio
Kettering Health Network was recognized as number one in Ohio and fourth in the nation for medical excellence in Orthopedic Care in 2015 by CareChex®, a division of CompariOn® Medical Analytics, one of the nation’s largest privately held healthcare information services companies. CareChex also recognized Kettering Medical Center as number one in Ohio and in recognition among the Best Hospitals in the Dayton metro area and the Ohio River Valley region.

Women’s Choice Network hospitals celebrated Women’s Choice Awards, the first national recognition identifying hospitals that meet the needs of women.

— Kettering Medical Center— orthopedics, cancer care, heart care, patient experience, and patient safety
— Sycamore Medical Center— orthopedics
— Grandview Medical Center— cancer care, orthopedics, patient safety
— Southview Medical Center— cancer care, orthopedics, and patient safety

Kettering Medical Center and Sycamore Medical Center were named two of the nation’s 100 Top Hospitals in 2015 by Truven Health Analytics. This is the eleventh time Kettering Medical Center has been recognized with this prestigious honor and the sixth time that Sycamore received the award.

100 Top Hospitals
Kettering Medical Center and Sycamore Medical Center were recognized by U.S. News & World Report as best regional hospitals for 2015-2016. Kettering Medical Center ranked number 18 among 210 hospitals in Ohio and is recognized among the Best Hospitals in the Dayton metro area and the Ohio River Valley region.

Grandview Medical Center is ranked number 25 out of 210 hospitals in Ohio and is recognized among the Best Hospitals in the Dayton metro area and the Ohio River Valley region.

50 Top Cardiovascular Hospitals
Triveni Health Analytics named Kettering Medical Center one of the nation’s 50 Top Cardiovascular Hospitals in 2015 for the sixth consecutive year.

Hand in Hand

To provide the most comprehensive cancer care in the Greater Dayton area, the network broke ground on a new cancer center. The five-story cancer facility connected to Kettering Medical Center will serve as a single touch point for patients, providing them with a wide range of services. A full menu of cancer-specific amenities is being tailored to patients in the new center.

Emergency Services

To give northern Warren, Preble, and Greene counties better access to emergency services, the network expanded two freestanding Emergency Centers and expanded the Emergency Department at Soin Medical Center.

Comprehensive Medical Care

Sycamore Medical Center added 30 private patient rooms to accommodate the increased demand for medical surgical services for orthopedic and bariatric surgery patients.

Grandview Medical Center added 48 private patient rooms and therapy space to support the hospital’s joint, spine, hernia, and cardiac programs.

Soin Medical Center expanded 30 private patient rooms and therapy space to support the hospital’s joint, spine, hernia, and cardiac programs.

Kettering Health Network Emergency Center in Franklin provided residents in southern Montgomery and northern Warren counties convenient access to full-service emergency care.

Building the Future of Cancer Care

To provide the most comprehensive cancer care in the Greater Dayton area, the network broke ground on a new cancer center. The five-story cancer facility connected to Kettering Medical Center will serve as a single touch point for patients, providing them with a wide range of services. A full menu of cancer-specific amenities is being tailored to patients in the new center.

Designed with input from cancer survivors on the Patient Advisory Council, the cancer center brings all of the network’s cancer services under one roof.

Specialized Services

Southview Medical Center renovated and expanded Southview Women’s Center as part of a campaign designed to offer health services for underserved women and babies in the Dayton area. The expansion includes a new 3-D ultrasound, more exam rooms, and private education areas.

Fort Hamilton Hospital’s Wound Care Center extended its award-winning wound care to a new location: the Liberty Pointe Wound Care Center. A member of the Healogics™ network, the Wound Care Center specializes in hyperbaric oxygen therapy and other treatments for chronic or difficult-to-heal wounds.

Fort Hamilton Hospital celebrated the opening of the Hamilton Health Center, which includes the new Joslin Diabetes Center and Kettering Physician Network Primary Care.

Orthopaedic Institute of Dayton (OID), Kettering Sports Medicine, and Kettering Physician Network Primary Care partnered to open a comprehensive orthopedic and primary care facility in Tipp City.

The network broke ground on Springboro Health Center, which features an outpatient pharmacy, diagnostic services, and Kettering Physician Network specialties including primary care, obstetrics and gynecology, pediatrics, orthopedics, and cardiology.

Dedicated to delivering the highest quality care in communities across the Greater Dayton region, Kettering Health Network expanded services to provide greater access to comprehensive and specialized health care.
At Kettering Health Network, reaching out to serve others is our sacred work. As the hands and feet of Jesus Christ, we extend care in many ways: nurturing the spirit of those who seek our help, hosting health events for the community, supporting others who share our common goal of service, and connecting people to resources that promote health and wellness. Some of our employees extend this ministry beyond our hospital walls, into the community, and throughout the world, embracing the universal impact of service.

“Serve one another humbly in love.”
GALATIANS 5:13 (NIV)
EMBRACING SERVICE

HUMAN SPIRIT

We believe prayer works. Our culture empowers our physicians and employees to pray with patients and minister to those who seek healing. Our network also offers many spiritual resources, from short devotional videos to an entire team dedicated to serving the spiritual needs of our patients.

GOD’S CARING IN THE EVERYDAY

Each year, the network dedicates a special Week of Renewal to focus on prayer and spiritual reflection.

A video devotional series and an extensive booklet offer advice from the Great Physician for curing soul fatigue. Prescribing resilience and gratitude to combat stress, worry, and guilt, the prayer booklet has been distributed to more than 250,000 people, including through the network’s Emergency Departments.

#HOLYTALK

Kettering Seventh-day Adventist Church pastor Karl Hoffner and his daughter, Lindsey, teamed up to share the Word of God today’s terms. Their booklet “Ten Punchy Paraphrases from the Sermon on the Mount” helps apply scripture to daily life.

CREATION WALLS

To share the word of God on all our campuses, the network continues to install Creation Walls consisting of eight sculptured panels—one for each day of creation, plus one to reflect on the beginning of time—throughout its campuses.

KETERING:60

A weekly source of inspiration and reflection, Kettering:60 videos break down the Bible into simple, minute-long messages that relate to people today. youtube.com/kettering60

GOSPEL FEST

More than 7,500 community members attended the network’s Gospel Fest, which featured free performances by 10 local bands and Grammy-nominated, six-time Dove Award winner Francesca Battistelli. The event highlighted such non-profit organizations in the community as Artemis and Donate Life, which seek to provide resources and opportunities for individuals to thrive.

SPIRITUAL SERVICES

Our Spiritual Services and Mission team is an extension of Jesus’ healing ministry. They focus on caring for the spiritual well-being of patients from all spiritual backgrounds by offering prayer support, counseling, grief recovery, and daily encouragement.

As a faith-based organization, we are blessed with the opportunity to care for the physical and spiritual health of others, which we consider sacred work. Because each person deserves our respect and devotion, we provide a healing environment that nurtures the human spirit.
EMBRACING SERVICE

KENYA, AFRICA
Jarrod McNaughton, president of Kettering Medical Center and executive vice president of Kettering Health Network, took a team of 24 to perform AIDS testing, clinical exams, and parasite treatment, caring for more than 800 patients during the 10-day trip. The team also hosted a Children’s Bible Program with 100 kids in attendance daily.

SHANGHAI, CHINA
Since 1986, Kettering Health Network has maintained a relationship with Huashan Hospital. Kettering collaborates with Huashan on ways to be innovative and grow.

PARAGUAY, SOUTH AMERICA
Steven Schmidt, MD, from Plastic Surgery Institute of Dayton and Kettering and Sycamore medical centers, went to Paraguay with a team of 50 others. The team treated 700 patients, performed 179 surgeries, and completed two projects to help provide residents with clean water.

Each year Kettering Health Network employees, physicians, and other affiliates volunteer to travel across the world to bring healing to the global community.

BELIZE, SOUTH AMERICA
Robert Pouts, OD, from Dayton Eye Care and Grandview Medical Center, performed more than 25 surgeries and screened or examined more than 350 patients, delivering care for cataracts and glaucoma to patients who neither have the money nor the transportation to travel for treatment from one of three ophthalmologists in Belize City.

ECUADOR, SOUTH AMERICA
Kettering Health Network, in partnership with the Tananda Foundation, provided care to more than 1,200 people in rural villages of the Andes Mountains in Ecuador. In 15 days of clinics in February and March, two groups of healthcare providers and volunteers provided care for 356 vision patients, 610 medical patients, 176 pediatric patients, and 550 dental patients.

WORLD SERVING THE

HONDURAS, SOUTH AMERICA
Ben Carpenter, visual marketing manager for Kettering Health Network, led a team of 15 to Honduras and treated 150 patients during their 10-day trip. They performed AIDS testing, clinical exams, and parasite treatment.

TRINIDAD AND TOBAGO, SOUTH AMERICA
Students, faculty, staff, and alumni of Kettering College served 605 patients in Trinidad and Tobago, screening for diabetes and checking blood pressure, cholesterol, weight, and BMI.

Network President Roy Chew; Chief Executive Officer Fred Manchur; and Kettering Medical Center Chief Medical Officer Robert Smith, MD, partner with hospital leaders in China.

Volunteers provide exams and construct a clinic site in Kenya. Watch the video at ketteringhealth.org/missiontrips

ECONOMIC SERVICE
HEALTH OUTREACH
Through community outreach, we host and attend many health-related events to provide screenings, education, exercise classes, and family fun. Empowering people to pursue healthy lifestyles, additional resources have been dedicated to improve the heart, diabetes, and breast health of the community.

Heart
203 heart education events
13,092 heart screenings
8,671 Abnormal findings referred to a physician

Diabetes
203 diabetes events
5,801 diabetes screenings
2,860 Abnormal findings referred to a physician

Breast
More than 54,000 breast screenings

HEALTH LITERACY
Through more than 200 pages of health information, Kettering Health Network’s three publications—Health Connection, Years Ahead, and Physician Quarterly—continue to connect community members to health services, educate seniors on available discounted programs, and support physician interaction and achievement.

LIVING UNITED
Each year, Kettering Health Network encourages employees to reach out to their communities through pledges to the United Way. In 2015, employees pledged a total of $296,161 that will create positive, lasting changes in the lives of thousands living in Montgomery, Greene, Preble, and Butler counties.

HEALTH LITERACY
Through more than 200 pages of health information, Kettering Health Network’s three publications—Health Connection, Years Ahead, and Physician Quarterly—continue to connect community members to health services, educate seniors on available discounted programs, and support physician interaction and achievement.

PINK GLOVE COMPETITION
The Medline Pink Glove Competition is an annual contest for healthcare organizations across the country to film a music video and raise money for breast cancer charities. More than 350 Kettering Health Network employees and community members partnered with the Dayton International Airport, the Dayton Dragons, and Miamisburg High School to film “Survivors: The Real Superstars.” Over $2,500 was raised for the Pink Ribbon Girls charity through the project.

PARTNERING TO IMPROVE LIVES
Kettering Health Network donated $5,653,813 to community organizations, including but not limited to:

Air Force Association
Alzheimer’s Association
American Cancer Society
American Heart Association
Clothes That Work
Community Blood Center
Dayton Area Chamber of Commerce
Dayton Art Institute
The Dayton Foundation
Dayton History (Carillon Park)
Dayton Performing Arts Association
Dayton Society of National History
Fed the Creek
The FoodBank, Inc.
Free to Breathe
Good Neighbor House
Hospice of Dayton
Juvenile Diabetes Research Foundation
Lueskin/Lymphoma Society
Life Essentials
March of Dimes
Miami Valley Women’s Center

“...So let’s not get tired of doing what is good… whenever we have the opportunity, we should do good to everyone…”
—Galatians 6:9-10 (NLT)
To care for others, we must first take care of ourselves. In addition to providing benefits, we provide employees with resources and events that promote wellness and show our gratitude.

Employee Assistance
Kettering Health Network offers an Employee Assistance Program that provides confidential support for employees and their families. The program features around-the-clock professional phone support, face-to-face counseling sessions, legal, financial, and identity-theft assistance, children and eldercare assistance, referrals to community resources, and a web-based portal that hosts articles and resources.

Employee Discounts
Employees have access to more than $4,500 in savings on thousands of local and national hotels, restaurants, retailers, car dealers, theme parks, national attractions, concerts, and events.

Employee Recognition
We are proud to support employees through our robust reward and recognition program, Network Stars. Anyone can nominate an employee for recognition and a reward, and each campus presents a gift basket to an employee of the month. Those who go above and beyond the duties of their job to improve the lives of others are also chosen for network-wide awards. In 2015, more than 2,200 Network Star nominations were submitted.

Tuition Assistance
Kettering Health Network offers an Employee Assistance Program to support qualified employees seeking to further their education.

Employee Appreciation
Employee Appreciation is our greatest asset. Their commitment to our mission is celebrated throughout the year with summer time employee picnics at every campus, Hospital Week celebrations, Nurse Week festivities, and holiday events.

Employee Wellness
We offer many health resources and programs to encourage employee wellness, including sports leagues, campus fitness centers, and same-day drop-in care. A kick off of summer wellness, employees were invited to share photos of healthy summer fun with co-workers and families.

Employee Appreciation
Kettering Health Network has focused on identifying and promoting singular best practices throughout the network. One Best Practice encompasses all facets of the network, including clinical quality, employee engagement, and patient satisfaction.

For several years, Kettering Health Network has focused on identifying and promoting singular best practices throughout the network. One Best Practice encompasses all facets of the network, including clinical quality, employee engagement, and patient satisfaction.

The goal of One Best Practice is to ensure that when a patient walks into a Kettering Health Network facility, they can be confident they will experience the same high standard of quality care and excellent service no matter what location they visit.

Here are a few ways in which we strengthened operations in 2015 through network alignment:

- Created a streamlined, more efficient EHR that provides employees easier access to resources and tools.
- Introduced culture initiatives titled “Called to Care,” emphasizing the importance of patient experience and listening to our calling to serve.
- Expanded emergency access points in our community and strengthened HNS relationships.
- Added our second Inspire Women’s Leadership Conference, which brought together 250 female leaders from across the network to engage in leadership development and fellowship.
- Created network service lines to provide vision and strategy to hospitals, programs, and other sites that are included in the service line.
- Held our second Inspire Women’s Leadership Conference, which brought together 250 female leaders from across the network to engage in leadership development and fellowship.
- Expanded partnership with Ohio Diabetes Center throughout the network.

To care for others, we must first take care of ourselves. In addition to providing benefits, we provide employees with resources and events that promote wellness and show our gratitude.

# Quality and Safety

To ensure that the people in our communities receive the best care possible, Kettering Health Network sets high standards for quality and safety.

---

**Why quality matters**

If every hospital across the nation performed as a Truven 100 Top Hospital:
- 104,000 deaths would be prevented
- 48,400 additional patients could be complication free
- $2 billion in inpatient costs could be saved
- 245,000 fewer patients would be readmitted within 30 days

---

**LENGTH OF STAY NETWORK HOSPITALS**

### The Right Care at the Right Time in the Right Place for Every Patient, Every Time

Kettering Health Network’s 2015 Quality goal was to improve how we manage patient care in the hospital setting and ensure that our patients do not have a greater hospital length of stay than is medically necessary.

In 2015, the network deployed a proactive, risk-based care delivery model that resolves potential and actual barriers to efficient care management and ensures that patients receive the right level of care at the right time and in the right place.

The network exceeded its stretch goal to decrease average length of stay by 4 days, ending 2015 at an average of 3.97 days.

---

**Bihu Sandhir, MD**

**Internal Medicine**

---

**QUALITY PRIMARY CARE**

By keeping patients the central focus of the healthcare team—which includes physicians, advanced practice providers, RN care managers, and practice teams—Kettering Physician Network made significant improvements in quality outcomes at primary care practices. Since implementing the Patient Centered Medical Home care delivery model, preventative tests such as breast, colon, and cancer screenings have increased on average by 20 percent. Overall, patients with diabetes have seen a 10 percent improvement in blood sugar control.

---

**To Embrace Service**

*We define quality and safety using Truven Health Analytics’ measures for a 100 Top Hospital, which are based on composite scores for patient safety, patient experience, hospital length of stay, care measures (evidence-based treatment guidelines), mortality, and readmissions to the hospitals within 30 days.

---

**Why Quality Matters**

- 104,000 deaths would be prevented
- 48,400 additional patients could be complication free
- $2 billion in inpatient costs could be saved
- 245,000 fewer patients would be readmitted within 30 days
At Kettering Health Network, we believe in healing the whole person—body, mind, and spirit. This approach integrates the care of the physical, intellectual, emotional, and spiritual needs of each patient in an intentionally healing environment. Our physicians, nurses, staff, and volunteers deliver healing through quality care with a personal touch, aided by superior technology and supported by a heritage of innovation. We are dedicated to meeting people where they are and providing healing in the ways they need it most.

Ruth Mahone suffered from light chest pain for years, but usually it went away. “I had the pain but mostly ignored it,” Ruth says. “I would just sit down and rest a bit, and it would go away.”

One fall day after blowing leaves, her chest pain didn’t go away. She sought emergency care, and the staff decided to keep her for observation.

Brian Schwartz, MD, a cardiologist at Kettering Health Network, told Ruth her aortic valve was opening less than half of what it should. She suffered from aortic stenosis, a narrowing of the aortic valve of her heart. Her valve needed to be replaced—or she might only have up to six months to live.

Traditionally, replacing the aortic valve requires open heart surgery, which usually requires a hospital stay of up to a week with the recovery period ranging from three to six months.

For 89-year-old Ruth, open heart surgery carried a high risk for complications.

Luckily for Ruth, she was a candidate for a new procedure. In 2011 Transcatheter Aortic Valve Replacement (TAVR), an alternative procedure that’s performed through the femoral artery in the groin, was approved by the U.S. Food and Drug Administration for aortic stenosis.

“Until TAVR became an option, our only option would have been open heart surgery. With this cutting-edge procedure, we avoided having to split the breast bone and put Ruth on a heart/lung bypass machine while surgery was underway,” said Dr. Schwartz.

Because Ruth was able to have the minimally-invasive procedure, her recovery was quick.

“She went in on a Sunday and we were home for dinner on Wednesday,” says Ruth’s son Terence, who was in town to be with his mother for her procedure and recovery. “She was driving again by Saturday.”

Ruth was so impressed with her fast recovery. Ruth returned to church on Sunday to the surprise of much of the congregation. “They were concerned because they thought I had chosen to skip surgery,” Ruth says. “When they found out I was out only days before, their jaws dropped.”

“I don’t know how I’d be if I didn’t have the procedure,” Ruth says. “I couldn’t have it any better; she healed. But I can’t say I’m any worse, and at my age, that’s good!”

Now Ruth is back to her daily activities, enjoying her independence and continuing to volunteer in her church. “A few years back, someone called and asked if I could help out once a week. Well I haven’t gone home since!”

“‘He heals the brokenhearted and binds up their wounds.’”

PSALM 147:3 (NIV)
Established in 1964, Kettering Medical Center is the flagship hospital of Kettering Health Network, serving patients throughout the Dayton area. The campus also includes the Benjamin and Marian Schuster Heart Hospital, which opened in 2010.

SERVICES
- Comprehensive cancer care, including chemotherapy, radiation, and the Versa HD™ linear accelerator
- Emergency, Level II trauma, and heart care by an accredited Chest Pain Center and Comprehensive Stroke Center
- Full range of testing, including MRI, CT, PET, clinical lab, and nuclear medicine
- Graduate medical education—four residency and fellowship programs
- Kettering Cardiovascular Institute
- Level III Maternity Unit and Neonatal Intensive Care Unit
- Orthopedics, including joint replacement and sports medicine
- Surgery, including gynecological, urologic, gastrointestinal, minimally-invasive, and robotic-assisted
- Neuroscience Institute, offering neurosurgery and epilepsy programs
- Expanded Level II NICU by adding five beds

ACCOMPLISHMENTS
- Awarded the #1 Hospital for major cardiac surgery in Ohio by CareChex®
- Awarded the #1 Hospital for trauma care in Ohio by CareChex®

KELLY ANSWERED PRAYER

Kelly was working third shift when he began to feel pain in his chest, and as the night went on, the pain grew more severe. On his way home, Kelly decided to go to the hospital and called his wife to let her know.

“I told her how I felt, and she said, ‘You’re in the middle of a heart attack,’” Kelly recalls. He went to the emergency room at Wilson Health, where the team confirmed his wife’s assessment. “My wife and I needed to pray, so we bowed our heads, and the next minute I heard somebody say an ‘Amen.’”

When Kelly looked up, he saw Kettering Health Network cardiologist Rehan Ahmed, DO, praying with them. “I told my wife we were in good hands,” Kelly says.

Kelly was transferred by MedFlight to Kettering Medical Center, where everything was ready for him. “The doctor put the stent in, and it was like getting a breath of life again. Almost exactly a week later, I was back to work. I believe in my heart that I got better quicker because of the love and support that I got through Wilson Health and Kettering Health Network.”

“I believe in my heart that I got better quicker because of the love and support that I got through Wilson Health and Kettering Health Network.”

— KELLY
SYCAMORE MEDICAL CENTER

Since 1978, Sycamore Medical Center has been providing residents of Warren, Butler, and southern Montgomery counties access to high-quality care in a comfortable and contemporary atmosphere.

JEFF IN GOOD HANDS

Usually un-phased by difficult tasks, Jeff was nervous as he prepared for hip replacement surgery. “But from the moment I hit the doors here at Sycamore, I felt I was being well taken care of,” he says. “The staff explained everything in a way that I could understand and made sure I always knew what was going to happen next.” Jeff’s Operating Room nurse, Richard, had a particular impact on him. “He walked into the room and had a very comforting way about him,” Jeff says. “He put me at ease, and I truly believe he’s blessed. When he wheeled me into the room, he put his hand on my shoulder and told me not to worry. I felt like God had touched me at that moment, and I knew I was in good hands.

“When a day or so, the chaplain visited me in my room, and I told him what had happened. He said, ‘I’ve got something you might want to have.’ And he pulled out a photo of a surgeon operating on a patient, with Jesus watching over them. It was an incredible feeling. And the feeling didn’t stop there. Jeff says, “I can’t say enough about Dr. Welker and his staff—I’m telling everyone I see about what he’s done for me. When I went to see him for my check-up, there was a bit of a limp. But he told me to pick a point on the wall and focus. When I walked again, the limp was gone. He put me at ease, so I could focus on getting better.”

**Accomplishments**

- Received the Women's Choice Award as one of America's Best Hospitals in patient safety, cancer care, and orthopedics.
- Recognized as a Best Regional Hospital by U.S. News & World Report.
- Verified as a Level III Trauma Center by the American College of Surgeons.
- Completed the build-out of 48 private patient rooms and opened two new nursing units, one to support trauma care.
- Opened an Emergency Center in Eaton, the first and only 24/7 emergency care facility in Preble County.
- Participated in the University of Dayton's Five Oaks “Leadership in Building Communities” project to partner with the community and improve opportunities for youth and families, safety and security, and community development.

**Services**

- Bariatric Center of Excellence
- Behavioral health, including adult and geropsychiatric programs
- Cancer care
- Emergency, Level III trauma, and heart care by an accredited Chest Pain Center and Primary Stroke Center
- Full range of testing, including MRI, CT, clinical lab, and nuclear studies
- Graduate medical education—residency and fellowship programs
- Operates eight major ambulatory care centers, including the free-standing Emergency Center in Huber Heights
- Orthopedics, including joint replacement and sports medicine
- Schimpar Eye Center
- Surgery, including open-heart, spine, and neurosurgery
- Operates eight major ambulatory care centers, including the free-standing Emergency Center in Huber Heights
- Orthopedics, including joint replacement and sports medicine
- Schimpar Eye Center
- Surgery, including open-heart, spine, and neurosurgery

**Established in 1926, Grandview** is nestled in a historic neighborhood and rooted in osteopathic tradition. Affiliated with the Ohio University Centers for Osteopathic Research and Education, Grandview is one of the largest osteopathic teaching hospitals in the nation.

**Jennifer, Partners for the Journey**

When Jennifer began to feel pressure in her jaw, she shrugged it off as a toothache. But when she awoke in the middle of the night with a blanket of pressure from her jaw to her elbow, she called her sister and asked to be taken to Grandview Medical Center. “I was so scared,” says Jennifer, who arrived in the middle of an active heart attack. “But my nurses never left my side. They were amazing and took a frightening situation and calmed me down.”

When tests revealed Jennifer’s condition, the care team kept her as their central focus. “They all came together, and they prayed with me,” she says. Cardiologist Vijai Tivakaran, DO, took Jennifer to the Cath Lab, and “the way he approached my care showed me I was important to him. He gave me his full attention. He told me, ‘I am your partner on this journey; you and I are a team.’”

“Every nurse and every doctor was so attentive during the entire experience—there was no stress. It was such a scary situation, but everyone they did this for me, and I know I was being taken care of. Grandview truly is a hidden gem.”

“**He told me, ‘I am your partner on this journey, you and I are a team.’ This team saved my life.**”

**The staff was there by my side the whole time, and now I can be there for my family.**

—KEN

Ken was going to meet his son when he noticed something wasn’t right. His head felt like it was ready to explode, he says, so his son took him to the Emergency Department at Southview Medical Center. The last thing Ken remembers was being told he had an aneurysm and being transferred to The Neuroscience Institute at Kettering Health Network.

After seven hours of surgery, two weeks in the hospital, and weeks of recovery, Ken was back to work painting and taking care of his family. “It’s amazing,” he says. “I’m still working and painting and taking care of my grandkids. I think that’s what the man upstairs wanted. I trusted God to take care of it, and it was with the help of everyone—the doctors, staff, nurses, and therapists. They helped me come back to my life.”

Delivering Care

Nathan on the Road to Recovery

At age 19, Nathan was working at a garage when a car pinned him against the wall. With a crushed pelvis, Nathan was rushed to Greene Memorial Hospital for trauma care. “Even though I was panicking, it felt pretty good that people were there for me, telling me everything was going to be okay.” Nathan was stabilized before being transferred to another network hospital for additional care. He continued working with doctors, nurses, and physical therapists to heal and make progress during the three months he spent in a wheelchair. “I remember Douglas Paul, DO, holding my hand and saying, ‘This is going to be a hard and long journey, but we’ll get through it together.’ From the minute I got to the Emergency Department, the care I received was phenomenal. I think some of the staff saw their own kids in me and treated me like family,” he says. “My care team was always there for me, and today I’m walking.”

“My care team was always there for me, and today I’m walking.”

—Nathan
Nelson’s oncologist, Manisha Nanda, DO, had other plans for him though. “It was crucial that Nelson’s treatment plan kept his passion for life alive. He’s a person who finds joy and love in everything he does,” she says. For more than three years, Dr. Nanda has focused Nelson’s treatment on keeping him active and spending time with family.

According to Nelson, every member of his clinical staff has become a part of his team. “You really get to know everyone, and they become like your family.”

“My cancer team has been fighting for me since the beginning... It’s because of them I’m going to finish this race.”
— Nelson

- 43,763 Emergency Visits
- 598 Physicians on Staff
ASHLEY TURNING MOMENTS INTO MEMORIES

After moving to Ohio, Ashley and her husband wanted to start a family. But when their first child was born, their experience with the hospital was less than exceptional. “All I wanted was to feel at home when I had my baby,” Ashley says. So she decided to look for a new doctor. “I wanted a place that had a big family feel, where people remembered my name. I found what I was looking for at Fort Hamilton Hospital.

“The attention that we got was beyond belief. The doctors were checking on me constantly. There was enough staff that they were able to help me when there were things I needed, but not so big that I couldn’t remember their names. Everything was taken care of. It was a great experience, and that’s the way it’s supposed to be.”

“They gave me moments that turned into memories.” —ASHLEY

Kettering Health Network’s only hospital outside of the Dayton region is located in Hamilton, Ohio. Fort Hamilton Hospital opened in 1929 as a result of a group of dedicated citizens uniting to raise the funds for a community hospital. Today, Fort Hamilton is a full-service hospital providing care to the people of Butler County.

SERVICES
- Cancer care at the Gebhart Cancer Center, featuring a linear accelerator
- Full range of testing, including MRI, CT, clinical lab, and nuclear studies

Donna struggled with depression for nearly three decades, but she began to find peace when she started working with James Barclay, MD, and her outpatient therapist, Christine, at Kettering Behavioral Medicine Center.

“Dr. Barclay and Christine are very important to me,” Donna says. “They have worked tirelessly with me to help me understand the traumatic events I’ve experienced and to resolve them. The three of us work together very well. When I started meeting with Christine, she didn’t press me for anything—she listened—and it helped me a great deal because I finally had someone I could talk to. Now Christine and I talk every week. It’s something I look forward to.”

Through the gradual healing process, Donna says her outlook and life continue to improve noticeably. “I was so happy when my husband said he even noticed a difference.” A hobby woodworker, Donna enjoys the process of shaping materials into new forms—much as she’s done through her own healing process. “I’m finding that now I make time to do the things I enjoy,” she says. “I’m making time to take care of myself, and I feel so much better. Now I look forward to getting up every day, and I have a reason to smile.”

“I’m so grateful for Dr. Barclay and Christine. Now I’m making time to take care of myself and I feel so much better.”

DONNA

HEALING TOGETHER

For more than 20 years, Kettering Behavioral Medicine Center’s team of doctors, social workers, nurses, psychologists, mental health technicians, and counselors has provided compassionate, confidential mental health services for children, adolescents, and adults.

EMERGENCY CARE

In an emergency, every minute matters. Because time is critical, Kettering Health Network has been on a mission to provide expert emergency care closer to where people live and work. In 2015 the network opened Soin’s expanded Emergency Department, which includes 12 new exam rooms, a nurse’s station, and supply areas.

The network also opened two freestanding Emergency Centers. The Kettering Health Network Emergency Center in Franklin, located off I-75 at the Franklin/Springboro exit on State Route 73, serves northern Warren County residents. The Emergency Center serving Preble County is located in Eaton, next to the network’s existing Preble County Medical Center. The 20,000-square-foot, 12-room Emergency Center is the only facility in Preble County to offer emergency services.

Kettering Health Network delivered emergency care at 10 locations, including two new freestanding Emergency Centers and one expanded Emergency Department.

Eaton, Ohio

In 2015 Kettering Health Network delivered emergency care at 10 locations, including two new freestanding Emergency Centers and one expanded Emergency Department.
At Greene Oaks, the highest priority is the comfort and care of the residents. Greene Oaks is a residential community located in Greene County, on the campus of Greene Memorial Hospital.

ACCOMPLISHMENTS
• Attained Music & Memory certification, a designation for quality of life improvement using music therapy for residents with Alzheimer’s Disease and dementia
• Improved the Ohio Department of Aging Resident Satisfaction Survey overall score by six points, with a resulting score of 91.9

SERVICES
• Independent living
• Skilled, intermediate, and rehabilitative nursing care
• Physical, occupational, and speech therapies
• Audiology, dental, nutrition, podiatry, psychological, and vision care
• Restorative nursing
• Medication assistance
• Alzheimer’s care
• Social activities
• Medical alert system with 24-hour emergency response

Sycamore Glen Retirement Community offers a maintenance-free lifestyle in a serene wooded residential setting. This community, located on the campus of Sycamore Medical Center, features independent-living and assisted-living options for seniors age 55 and up.

ACCOMPLISHMENTS
• Recognized resident veterans’ service to the country with a Veteran’s Wall Dedication ceremony
• Received a 97.5 satisfaction rate on the Ohio Department of Aging Resident Satisfaction Survey, ranking number 1 in Montgomery County and number 27 in the state of Ohio among 635 assisted living facilities

SERVICES
• Chef-prepared meals
• Exercise classes
• Planned activities and outings
• Travel support
• Close access to hospital, physicians, and emergency care
• Library
• Landscaping, cleaning, and laundry services
• Apartment, duplex, and single-family housing
• Secure senior living community

Sycamore Glen Health Center specializes in short-term rehabilitation stays, skilled nursing and long-term care. Located in Miamisburg on the campus of Sycamore Medical Center, the health center offers the perfect combination of quality care, security, and companionship. With comprehensive services to each individual’s specific needs, the center provides the tools needed for living the most independent life possible.

ACCOMPLISHMENTS
• Received a five-star rating from the Centers for Medicaid and Medicare Services (CMS) on Nursing Home Compare
• Achieved a deficiency-free Ohio Department of Health annual survey

SERVICES
• Short-term rehabilitation
• Long-term care
• Physical, occupational, and speech therapies
• Audiology, dental, nutrition, podiatry, psychological, and vision care
• Medication assistance
• Restorative nursing
• X-ray and lab services

Kettering Health Network offers a full range of health services designed just for seniors. From nursing homes, rehab services, and independent living, we offer senior living opportunities in Montgomery and Greene counties.

ACCOMPLISHMENTS

- Ranked No. 1 in Ohio and No. 16 in the nation after Harvard in the Brookings Institution’s earnings-based “value-added” ranking system for colleges and universities.
- Ranked a Top 10 Ultrasound and Sonography Technology Program in the nation by Study.com.
- Received the Best Value School award from University Research & Review for the second consecutive year.
- Ranked No. 5 in Ohio for 2015-16 online college programs by Affordable Colleges Online.
- Received the Distinguished Registered Respiratory Therapist Credentialing Success award from the Commission on Accreditation for Respiratory Care for the second consecutive year.
- Welcomed inaugural class of the occupational therapy doctoral (OTD) program, the school’s first doctoral program and one of only 21 OTD programs nationwide.
- Launched a dedicated education unit with Kettering Medical Center neurological care unit, which will provide a full immersion learning experience for nursing students and is only the third of its kind in the state.
- Launched an International Medical Missionary initiative, allowing students to serve as medical missionaries in remote medical clinics around the world.
- Raised $31,340 for the Good Neighbor House from the student-led annual Spring into Health 5K.
- Purchased new technology and equipment for the sonography, radiologic sciences, and advanced imaging programs.
- Celebrated 40 years of graduating physician assistants. Kettering College was the second institution in Ohio to establish a physician assistant program; it is now the longest continuously running program in the state and one of the oldest programs in the nation.

DEGREES OFFERED WITH PROGRAMS OF STUDY:

- Bachelor of Science in Healthcare Management (starting fall 2016)
- Bachelor of Science in Pre-Occupational Therapy (starting fall 2016)
- Bachelor of Science in Nursing (three-year)
  - Nursing—completion (three-year completion AS to BSN)
- Associate of Science in Medical Laboratory Technology
- Bachelor of Science in Physiology
  - With emphasis in Respiratory Care (three-year)

KETTERING COLLEGE

A fully-accredited college offering graduate and undergraduate degrees in health sciences, Kettering College was founded in 1967 as a division of Kettering Medical Center. The college’s curriculum meets the needs of today’s dynamic healthcare environment. Viewing health as harmony with God in body, mind, and spirit, Kettering College prepares students to deliver care and healing.
As a faith-based, not-for-profit organization, we protect and carefully manage the resources entrusted to our care, using them to support the health and future of others. Our financial resources are allocated to advocate for those who need help accessing health care, provide a living for our employees, advance our facilities to meet the needs of those we serve, and secure the financial health of our organization so we can continue moving forward in our care for the community.
KETTERING HEALTH NETWORK 2015 FINANCIAL SUMMARY

TOTAL NET REVENUE: $1,503,382,000

EXPENSES

COMMUNITY HEALTH IMPROVEMENT SERVICES: $4,768,939

SUBSIDIZED HEALTH SERVICE: $19,142,842

EDUCATION: $16,261,519

FINANCES

Because Kettering Health Network is a not-for-profit organization, all net revenue over expenses goes back to our hospitals, facilities, and services. Unlike for-profit healthcare organizations, where money becomes dividend checks to investors, this money funds capital improvements, enhanced patient care, new hospital programs, and community outreach.

2015 SUMMARY OF COMMUNITY BENEFIT

Every day Kettering Health Network gives back to our communities in the form of free health care, community health improvement, health professions education, research, and other subsidized health services to address priorities identified as important by our communities. We also cover the costs of Medicaid, Medicare, and other government-sponsored programs that the programs fail to cover.
When donors choose to support one of our network’s four foundations, they place not only a gift in our care but also trust in our discernment. In response to that trust, the foundations invest resources into our hospital services, healthcare education, resident physicians, employee development, and ultimately the future health of the community.

When Abby was diagnosed with cancer at only 28 years old, dozens of people reached out to support her, including Charles Fox, a man she’d never met. Inspired by his own wife’s battle with cancer, Charles wanted to give comfort to other cancer patients during treatment—a time when they may be uncertain, nervous, and scared. When Charlotte Fox was battling ovarian cancer, her daughter gave her a luxurious blanket—one Charles began taking with her to treatments.

“She so enjoyed it,” says Charles, who recognized how important the blanket was to Charlotte during her treatment process. After Charlotte passed away in 2009, Charles began buying and donating blankets to Kettering Medical Center Foundation, one of the network’s four foundations, which distributed them to patients undergoing chemotherapy.

“I wanted to do something on a more personal level,” Charles says. “We spend most of our lives trying to generate funds to live on. But sometimes you need to just show love to other people. And the more you give to others, the better you’ll feel by it.”

Since his project began, Charles has supplied gifts of comfort to almost 1,000 patients in Dayton, Cincinnati, and Columbus, providing encouragement to patients as well as their family and friends.

“You can see it on every patient’s face and on the face of every family member—just how overwhelmingly grateful and appreciative they are,” says Renee Rubin Handel, a foundation board member who has personally distributed hundreds of Charles’ blankets.

“When you hand them a blanket, you’re giving them the message that someone cares. They don’t just feel warmth, but compassion. It’s a small gesture that represents so much.”

Abby was the first to receive one of Charles’ donated blankets. “When I was sick, I would frequently go weeks with only seeing close family and my medical team,” she says. “Receiving phone calls, emails, flowers, and blankets was offering me only real interaction with the outside world. People don’t realize how powerful those seemingly small gifts can be for someone fighting for their life. They cling to those acts of kindness. These gestures give them hope, comfort, and an indescribable urge to keep fighting.”

For Abby, who now helps the foundation raise funds to provide cancer screenings for the underserved, giving back has become a passion that helps her lead a meaningful life. “I abide by the Dalai Lama’s mantra that our prime purpose in this is to help others,” Abby says. “I want to make sure someone else doesn’t have to go through what I did, or at least make sure their walk is a little easier than mine was.”

“Do not withhold good from those who deserve it when it’s in your power to help them.”

—PROVERBS 3:27 (NLT)
Kettering Medical Center Foundation continues to promote excellence in health care, research, and medical education through funds serving Kettering and Sycamore medical centers, Kettering College, and their associated programs.

In 2015 the foundation raised $8,526,698 and provided $909,039 in support of hospitals and programs.

**SUPPORTED**

- Breast imaging services for underserved women
- Assistance to underserved cancer and diabetes patients
- Newborn Reimbursement Program
- Supplies for underserved Behavioral Medicine patients
- Oncology patient education
- Patient counseling services
- Neurohelath assistive devices for stroke and brain injury patients
- Development of a new PET tracer element
- Assistance with several patient support group programs
- Cancer Symposium featuring nationally renowned speakers
- Cardiology equipment: cryotherapeutic equipment to treat atrial fibrillation and cardiac surgery equipment
- Kettering College scholarships and mission trips
- Advanced continuing education for clinical staff
- Advanced physician education
- Specialized medical equipment for Labor and Delivery, Intensive Care, and Radiation Oncology departments
- Breast imaging services for underserved women

**EVENTS**

- The Walk for Women’s Wellness proceeds contribute to the Foundation’s Women’s Wellness Fund. It is a favorite event for breast cancer survivors and for family members and friends who walk in honor of or in memory of a loved one.
- The Foundation Golf Classic proceeds historically provide services for uninsured or underserved patients. Most recently, the proceeds funded diabetes management classes and supplies for uninsured patients and assistance for cancer patients with special needs.

**THE GRANDVIEW FOUNDATION**

The Grandview Foundation is committed to education that supports the unique osteopathic approach to health care, consistent with the legacy of Adventist health care: the delivery of high-quality medical services to improve the lives of the people in our community and research to promote those areas.

The Grandview Foundation raised $676,880 in 2015. It contributed $2,371,775 to support Grandview and Southview medical centers.

**SUPPORTED**

- Construction of 44 new private patient rooms
- Funding for the ENT residency program’s temporal bone lab
- Audiovisual equipment upgrades for classrooms at Cassano Health Center and Southview Medical Center
- Mission trips by medical residents to Belize and Honduras
- Funding for two bronchoscopy probes for use in diagnosing and treating lung cancer
- Operating Room Optimization study to improve utilization and efficiency in scheduling
- Provided gifts and a holiday party for residents of two Dayton neighborhood nursing homes
- Provided $700,000 in academic teaching stipends for program directors of Grandview and Southview’s 16 residency training programs

**EVENTS**

- The 27th annual Eagle Seekers Golf Tournament, held at Dayton Country Club, raised more than $150,000 for RACE for Health, a resident and community education initiative.
- The foundation hosted a dedication of Grandview’s Ear, Nose, and Throat (Otolaryngology) residency program’s temporal bone lab.
- The 27th annual Eagle Seekers Golf Tournament, held at Dayton Country Club, raised more than $150,000 for RACE for Health, a resident and community education initiative.
- The foundation hosted a dedication of Grandview’s Ear, Nose, and Throat (Otolaryngology) residency program’s temporal bone lab.
- The foundation hosted a dedication of Southview Women’s Center renovation and expansion. In addition to a complete renovation of the center, this project added two exam rooms and a patient education room, and purchased a 3-D ultrasound and advanced digital colposcope to provide additional patient services.
**Hand in Hand**

Greene Medical Foundation fosters community partnerships to advance Kettering Health Network’s care facilities in Greene County, including Greene Memorial Hospital in Xenia and Soin Medical Center in Beavercreek.

In 2015 the foundation raised $955,435 and contributed $786,583 in grants.

**Events**

- **Sponsored by Greene Medical Foundation for almost 20 years, the Titanium Golf Tournament raised $34,000 to underwrite the purchase of new laboratory equipment and the furnishing of draw stations at Greene Memorial Hospital.**
- **The world-renowned Trans-Siberian Orchestra chose Greene Medical Foundation as its charity of choice for its Christmas concerts at Wright State University’s Nutter Center, helping provide more than $20,000 to support Foundation grants.**
- **More than 500 walkers participated in the 22nd annual Circle of Victory Cancer Awareness Walk, which raised almost $70,000 to help cancer patients. The closing ceremony culminated in a 700-balloon launch recognizing the average number of county residents who face cancer on any given day.**

**SUPPORTED**

- Patient Exercise and Nutrition program for the Cancer Centers at Greene Memorial Hospital and Soin Medical Center
- Patient support materials for Cancer Centers
- Furnishings for Greene’s 49 patient rooms
- Holmium Laser System for kidney stone surgery at Soin Medical Center
- Construction of Kumar Conference Center at Soin to support medical education and community outreach
- Labs’ Ahead program and Senior Lecture Series at Greene and Soin
- Circle of Victory programs, which supports cancer patients
- Employee Giving Fund, which supports staff at Greene and Soin
- More than 550 walkers participated in the 22nd annual Circle of Victory Cancer Awareness Walk, which raised almost $70,000 to help cancer patients. The closing ceremony culminated in a 700-balloon launch recognizing the average number of county residents who face cancer on any given day.

**Fort Hamilton**

The Greater Hamilton community continues to generously donate to several fundraising efforts, helping Fort Hamilton Hospital expand services, improve patient areas, provide service to the community, enhance the hospital, and bring state-of-the-art technology to the Hamilton area.

The Fort Hamilton Foundation collected $500,000 to 2015 to benefit the hospital and local community.

**Events**

- The annual Spring Luncheon featured guest speaker Hamilton City Manager Joshua Smith. Attendees learned about the city’s ongoing strategic improvements.
- To benefit the Employee Assistance Fund, the foundation hosted a Basket Raffle that raised more than $6,500.
- More than 250 guests enjoyed the Grease-themed annual Ticket to Hollywood event, which featured movie-themed entertainment including a 50s-themed dinner, a local band, and a silent auction. The foundation raised more than $48,000 to support Fort Hamilton Hospital’s cardiology services.
- More than 500 walkers participated in the 22nd annual Circle of Victory Cancer Awareness Walk, which raised almost $70,000 to help cancer patients. The closing ceremony culminated in a 700-balloon launch recognizing the average number of county residents who face cancer on any given day.

**SUPPORTED**

- Through the Angel Fund, the foundation has provided medical supplies and prescriptions for indigent patients
- More than $205,000 to remodel the Emergency Department, providing access to high-quality emergency care 24/7
- Employee assistance program
- Renovation of the maternity unit to create a state-of-the-art, nurturing Family Birthplace
- Raised $54,438 to support the education and wellbeing of hospital staff
